Diagram illustrating a hierarchical clustering process, likely representing a phylogenetic tree or a nested set of groupings. The structure shows a series of nested parentheses on the left, indicating the sequence of groupings, and a corresponding branching structure on the right, showing the hierarchical relationships between the elements.

The elements are grouped into four main clusters, each containing four elements:

- Cluster 1 (Top): Elements 1-4
- Cluster 2: Elements 5-8
- Cluster 3: Elements 9-12
- Cluster 4 (Bottom): Elements 13-16

The branching structure on the right shows the hierarchical relationships, with the root branching into two main groups, each containing two of the four main clusters.
